Smart G4 Museum UI

G4 Museum UI

SB-DDP-EU/ Museum

Smart G4 provides unique ability to serve museum needs both for outdoors and indoors. Smart G4 research team has invented many solutions that fits different Museums, visitor ages, and different languages. Here is some of the solution Ideas:

- Dynamic lighting (Moving light effects to show different attracts in the display item)
- Contained Audio domes (Sound stays contained – do not bother other visitors)
- Audio and Videos plays based on occupancy and the preferred language that can be selected or sensed using BT or NFC
- Multi-lingual Touch menu displays and panels
- General Lighting control of the building façade and indoor areas
- Climate control with special humidity, air temperature and quality control
- Energy Saving in general
- Special Areas secured Authorized access control
- Total Lockout system in case of Alarm for high security museums with multiple lines of defense automated scenario
- More big list of Ideas available for different Museum types

Central Monitoring Dash-boarding

Monitor all Locations
Control based on schedules, events or manual
Report and decision making adjustment

School / College Attendance and Tracking

Smart G4 provides Bio-S Smart School Secure and Easy classroom attendance logging system .
The device can be installed at every Lecture room door/ Auditorium entry to log in the students attendance for different lectures.

For children schools, a tapered entry at main school entrance with Entry and Exit Bio-S device shall ensure the logging and tracking of each child which can also be tracked on internet dashboard securely by parents.

The Bio-S will warn if any child is leaving unattended accordingly, and will also alert if any unauthorized person is trying to enter school grounds.

This Device together with other smart G4 solutions can help secure and safeguard the beloved ones at minimal costs.

School Bus Safety and Tracking

It is very important for parents to track their child mobility and safety at any time and at all times with automated alerts. The smart School BUS Bio-S can identify and log school children entering the bus and exiting the bus with exact time/date stamp. Additional SMS can be sent to parents informing them that child is back home already.

SB-BioS-FL

School Student Safety

School Bus Child Safety (Never leave any one behind)

Many fatal accidents has been reported especially during very hot seasons where some children fall asleep and remain inside bus. while driver assumes that all the bus has emptied, he locks it leaving the child to die in agony of heat and thirst.

smart G4 has designed 2 solutions for this:

The Bio-S that counts the In/Out and has display for Student safety.
The S-BUS Child safety System (Children Counter)

Active Shooting Lock down Safety

Smart G4 Cyber-night (SERAI) has developed a new simple yet most effective classroom lock down response unit to make sure that all children are safe inside classrooms during active shooting. deterring the attacker from wasting his time to invade and break school locked classroom.

While locking the door idea sounds simple, it is not the case in real life scenario. Most the panicking students as well as teachers would not have the courage to approach the door to lock it.

With our classroom responder, it is as simple as pulling a string that runs around all the classroom and can be pulled from any corner people are hiding at. (It is similar to the Pull string available in US buses like greyhound and other.

SMART Simplified BMS

Garage G4 Solution - Entrance Lobby and Elevator - Building Corridors - Building Pumps - Building HVAC

BMS Simple G4 Solutions

Water tank Level alerts
 Septic tank Level alerts
 Irrigation Control
 Sump Pump
 Boilers Control
 Elevator Control
 Alerts and Safety

Other BMS basics

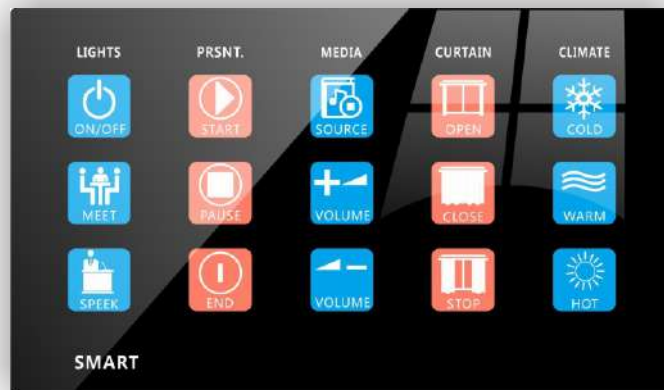

Digital Media Solutions

Digital Signage and Content management

Local and remote content Control
LED Large Displays indoor and Outdoors
Elevator signage
retail signage
Malls Signage

Meeting Room Solutions:

Video Conferencing MediaConf
Meeting Room Signage
Meeting Room and Ball Room Systems:
Lighting, HVAC, People counting, Audio Video
Curtains, Stage control, Projections and More..

Parking Space Management Solutions

Pay2Park

Affordable,
Very accurate
Easy Solution

Are you in the business of renting vacant lots for Parking space?
Do you face challenge in Keeping accurate accounting of real car entry and exit?
Do you want to avoid Expensive gates, cameras & recording or card pay booth system?
Do you want an economical, yet secure and easy to access solution on demand?
Do you want A solution that can be easily moved to another parking lot fast and easy?

Pay2Park system Advantages:

1. Complete Packaged solution
2. Free hosting, no yearly fees
3. No need for public IP and PC
4. System works both: as standalone server (Offline) or through internet cloud based (Online)
5. 60 minutes Power autonomy in case of power shortage
6. Display parking statistics indicating rush hour periods
7. Multiple reports and accounting ability
8. 2 Rates ability based on time of entry (normal and rush hour)
9. 2 security levels / access privileges
10. Affordable cutting edge technology
